TECHNICAL DATA SHEET

PLASTIC PRIMERS

1. Introduction

A range of acrylic primers designed to bond to rigid plastics, and to provide a surface suitable for the subsequent application of primers, finishes and lacquers.

Grey [UK612]

Red [UK611]

White [UK610]

2. Where to use

On most rigid, non-porous plastics, including glass reinforced polyester, polyurethanes, unplasticised PVC and most thermosets. This product is ideal for use on plastic bumpers and wheel trims.

3. Where not to use

- On flexible plastics
- On thermoplastics such as acrylics, polystyrene, polyolefins etc.

4 Benefits

- Promotes optimum adhesion to plastics surfaces
- Eliminates the need for specialised pre-treatments.
- Suitable for use on ferrous metals

5. Physical properties [Primer bases except where stated].

Appearance Coloured liquids with characteristic paint solvent odours.

pH Not applicable Specific Gravity 1.15 - 1.28 Viscosity 500 - 1,600 cPs Non Volatiles % m/m 45 - 60

Active Content % m/m, as supplied 15 - 20

Flammability, as supplied Extremely Flammable, flash point below -20°C

Composition Data, as supplied A solvent based solution of an acrylic resin, containing a range of

pigments, extenders, plasticizers, and thixotropes, dispersed in a

butane/propane/isobutane hydrocarbon.

Volatile Organic Content as supplied Compliant with EU Directive 2004/42/CE

Service Temperatures Up to 80°C Application Temperatures 15 - 25°C

6. Application Details

Prepare the area to be treated, ensuring freedom from dust, grime, mould release agents, greases, oils etc, using a detergent solution followed by rinsing thoroughly and drying. Corrosion, on ferrous surfaces, other surface contamination, and loosely adhering matter should be removed with an appropriate grade of wet and dry abrasive cloth. Following preparation the surfaces should be further treated with a solvent wipe using HYCOTE BRAKE CLEANER, [XUK302], white spirit, or thinners and allowed to dry.

If in doubt about the composition of the substrate, undertake a small test application on an inconspicuous area prior to use to ensure suitability.

This information is provided in good faith based upon data and sources believed to be reliable and correct. Conditions of use, outside the control of the Company, dictate that no responsibility can be assumed for the ultimate performance of this product.

TECHNICAL DATA SHEET

PLASTIC PRIMERS

Shake the can thoroughly for at least two minutes. Repeat shaking at regular intervals during use.

Apply sparingly from a distance of 20 - 25cm. Apply 2 to 3 light coats as necessary to achieve total and even coverage, leaving at least 15 minutes between each application.

Allow at least 24 hours between application of final coating and preparation for any subsequent finishes that may be required.

On completion of use, invert can and depress actuator for a few seconds to prevent nozzle blockage.

7. Availability

400ml aerosols.

B047170/47172/10001, RJB, August 2017.
